## Full Stack Web Developer

köpenicker strasse 191, 10997 Berlin / +49 1590 1294076 / jsk900@yahoo.co.uk / [Github](#) / [LinkedIn](#) / [resume.goldencat.co.uk](#)

### Profile

Junior Web Developer with an IBM mainframe programming background. I have recently completed a twelve week extensive boot camp at Spiced Academy Berlin as a Full stack web developer. Working as an IBM analyst programmer for many years in many international companies large and small has given me a full and varied experience dealing with all sorts of people and a wide range of experience dealing with programming and IT issues and finding appropriate solutions. As a Junior Web Developer I am keen to further my career and my knowledge as a full stack web developer.

### Technology Skills

HTML5 CSS3 JavaScript JQuery Node.JS Express Handlebars React Redux Angular Postgres SQL

FlexBox CSSGrid Flash CS3 Flash ActionScript Fireworks CS6 Photoshop CS6 Visual Studio 2012

AS/400 RPG/400 AVR.NET C#.NET Classic ASP ASP.NET

### Portfolio

<http://marvellous-characters.herokuapp.com/>

This was the end of course final project at Spiced Academy Berlin. This application uses Node.js and Postgres for the backend functionality and React for the Frontend. Users have to register an email to gain access to the site. The Marvel Comics API is used to populate the site with character and comic information. The user is able to search for character as well as add characters to the favourites section.

<http://doggypetition.herokuapp.com/>

This project was part of the intensive course at Spiced Academy Berlin. Written with Node.js, Postgres, Express Handlebars and Canvas. The user has to register their email to be able to access the site, sign the petition and enter extra information. The user could also delete their signature as well as view all signees by city.

This site contains links to some of the projects I built while at Spiced Academy Berlin.

### Professional Summary

#### July 2011 – October 2017 German Language Immersion

During part of this time I achieved a B1 level in Deutsch.

#### June 2007 – June 2011 Analyst Programmer at The Disney Stores London

Maintenance and support of Island Pacific package as well as working on bespoke projects. Using different technologies such as RPG/400, AVR.NET (Visual RPG) and Microsoft C#. I was involved in many projects while at Disney. One involved RPG/400 to automate the overnight process. This collected all sales and inventory data from all the tills at all the retail outlets and processed that data into the AS/400 databases. The next large scale project meant quickly learning and adapting to new technologies. This involved the replacement of IBM AS/400 green screen programs with windows based programs using AVR.net and C#.

#### May 1995 – April 2007 Freelance Analyst Programmer Bourjois Ltd London

This was a general role for the support and maintenance of the JBA package. As well as working on the development of an in house product tracking system.

**Save the Children Fund, London**

Management of in house bespoke systems and the JBA package. Also developing interface programs collecting and writing data to the JBA package.

**L'Oreal Golden Ltd London**

In house Sales systems support and maintenance. Also the development of conversion programs injecting mainframe data into SQL databases.

**Digital Motion Ltd London**

Web application, E-Commerce solutions and back end connectivity development using Dreamweaver and Drumbeat 2000.

**Web essential Ltd London**

Web application and general website development using HTML, CSS, and classic ASP.

**Avidesa/Nestle (Spain)**

Development of interface programs converting data to and from AS/400 systems to SAP systems.

**April 1988 – April 1995 Senior Analyst Programmer Videoprint London**

Having previously worked on IBM machines I was hired to setup and maintain the hardware and software for the new generation systems from IBM. Having just purchased an IBM AS/400 and Videoprint being a green field site, my initial role was to install and setup the AS/400 hardware, devices, cabling and software installation. Over time I taught myself the system language (RPG/400) eventually becoming the senior programmer. I was responsible for all hardware, software installation and maintenance for this large multisite company with over a five hundred employees.

## Professional Training

**2<sup>nd</sup> Oct 2017 – 22<sup>nd</sup> Dec 2017**
